PROJECTS

- **DenishExamEdge – Student Test Upload & Evaluation Platform:**
  Developed full-stack Flutter + Flask platform for test management. **Containerized the backend using Docker** and deployed on **AWS EC2** with **RDS MySQL** for scalability and high availability. Implemented REST APIs, JWT authentication, and OTP-based login.

- **Spotify link to mp3:**
  Created a **Flask microservice** to convert Spotify links into MP3 using **SpotDL + YouTube APIs**. Designed modular backend logic and deployed using **GitHub Actions + AWS EC2**.

- **To-Do app:**
  Developed a **Flask + Bootstrap task manager app** with CRUD functionality, database storage in **MySQL**, and **automated deployment pipelines**.
